The Forestry Challenge is an academic event for high school students in technical forestry and current forestry topics. Participants spend four days in the forest learning about the ecology and management of the forested landscapes that provide communities with water, recreational opportunities, wood products, and wildlife habitat. Youth benefit by better understanding the relationship of the forested environment to their community, by exposure to natural resource management as a potential career option, and by undertaking a rigorous critical thinking exercise which is timely and addresses current forestry topics such as wildfire, insects, and forest health.

“The Forestry Challenge was an absolute blast. I’m so thankful I got to learn about my environment in such a positive way.” - 2018 Forestry Challenge Student

“Forestry Challenge is a great introduction to the industry of forestry. It is a motivational experience that launches students into an exciting career path.” - 2018 Forestry Challenge Teacher
